VISION & MISSION

Vision

We are the innovative market leader for linear light. Our tailor-made lighting solutions from our own manufacture enrich outstanding projects worldwide. Our values lead the way.

Mission

We speak light. With curiosity, willingness to change and passion, our innovative technology enables ground breaking new design ideas building bridges between architectural design elegance and actual technical implementation. Designed - Engineered - Made in Germany. Together with our partners, we push the boundaries of the design limitations, act sustainably and live up to our ethical and social responsibility.

Our purpose

Our love for light inspires our actions. Our employees are at the heart of it all: expertise and passion are part of our DNA. The combination of sustainability, mutual growth and the highest quality is the impetus for our future. Open an honest dialog with our partners will lead to continuous improvements and value brought to all our stakeholders and projects.

APPLICATION AREAS

Façade

Redefine modern architecture and organic shapes

Hospitality & Residential

Create pleasureable living, resting and entertainment spaces

Urban Spaces

Guidance systems and orientation ensure safety and create memories

Culture

Reveal heritage buildings and exhibit artwork

Retail

Create extraordinary shopping experiences

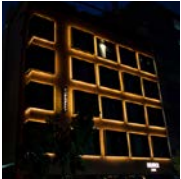

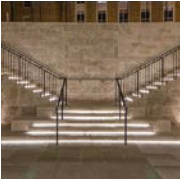

Office & Education

Make workspaces attractive, lively and comfortable

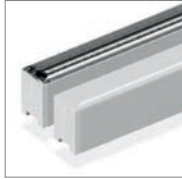

OUTDOOR SOLUTIONS

FLEX LIGHTS

Product	VENUS IP67	VENUS TC IP67	AMOR IP67	HYDRA IP67	HYDRALUX IP67
Description	Light lines bendable in one direction (top view or side view) with a perfectly homogeneous and dot free light surface for outdoor architectural lighting.	Second generation of VENUS available in 2 variants (top view or 3D bendable) enables an optimum rendition of the LED spectrum (minimal color shift).	Slim (5 mm x 13 mm) dot free and homogeneous side bend light line for delicate contour lighting.	Pixelized light line produced to the desired length with IP67 connectors on both ends for fast indirect facade lighting installations.	Field cuttable light line with visible pixels and high efficiency ideal for indirect lighting applications.

LUMINAIRES

ADONIS
ARCHITECTURAL IP67

Thanks to its perfect integration, this luminaire is ideal for grazing applications as well as for direct lighting on facades and ceilings. With smart cabling, innovative end cap design and various mounting options it enables seamless light lines.

XOOLINE IP67

Modular luminaire with 6 different optics to accommodate for any application. Several cabling options and a large panel of mounting accessories are available.

XOOLUM IP67

Luminaire with 45° adjustable head with opal encapsulation for wall-washing, general or accent lighting. Mounting profile offers plenty of space for cabling beneath the fixture.

XOOLIGHT IP67

Sleek design luminaire for general lighting manufactured to length. Available as pendant, surface and recessed.

VarioLED IP67

Pixelized light line produced to the desired length with IP67 connectors on both ends for fast indirect facade lighting installations. Suitable with 5 different optics.

OCEANOS IP67

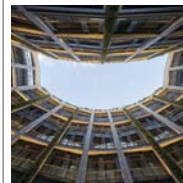

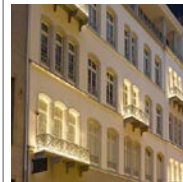

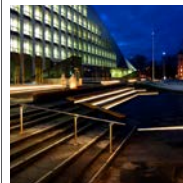

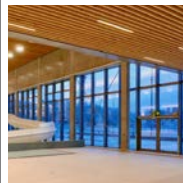

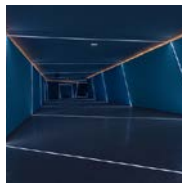

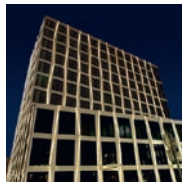

Robust, drive over, dot free and homogeneous light line available also with 10° and 30° optics. It is made of marine grade stainless steel available in two standard lengths.

XOOLUX NANO IP67

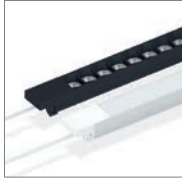

XOOLUX NANO is a minimalistic luminaire designed primarily for grazing applications embedding high precision nano optics. Field adjustable in 15 degree increments for accurate aiming.

INDOOR SOLUTIONS

LUMINAIRES

ULTIMA

ULTIMA represents a groundbreaking step for lighting integration in the architecture. Its minimal design and 7 powerful nano optics make the fixture blend in any building structure and disappear.

XOOLINE

Minimalistic surface mount luminaire with 9 different symmetrical, grazer and opal optic options to accommodate for any application. Several cabling options and a large panel of mounting accessories are available.

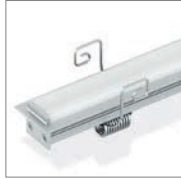

LYRA

Elegant and chic round luminaire for pendant or surface mounting with various optics choices, further increasing the possibility of creating unique solutions.

LUNA

Small recessed luminaire family complementing XOOLINE with same choices of optics.

XOOLUM

Compact luminaire with adjustable luminaire head (45°) for a wide range of applications, either surface or pendant mounted.

MARS

The MARS luminaire system is a range of stylish linear solutions for general and task lighting, featuring 4 powerful and precise nano optics. Mounting options: recessed, ceiling or pendant.

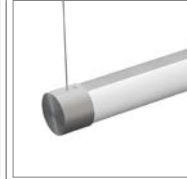

VAULT

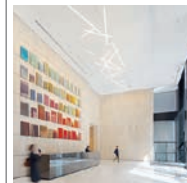

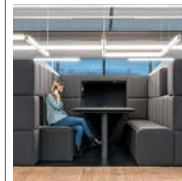

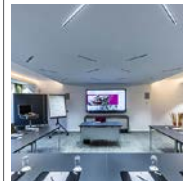

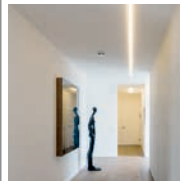

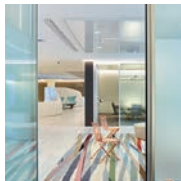

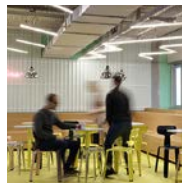

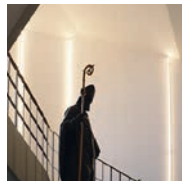

VAULT addresses the need for a flexible and easily installed lighting system. Ideal for applications with high level exposed ceilings, the system can be wall or pendant mounted, complementing the interior design of the space.

XOOTUBE™

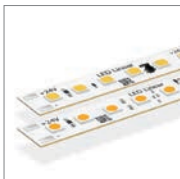

As eye-catcher in every lounge, mall or lobby. Elegant circular pendant luminaires and 360° beam angle industrial designs all with a high lumen output. XOOTUBE can be mounted horizontally or vertically.

LED FLEX TAPES

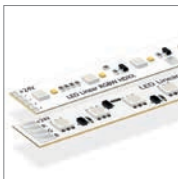

Static White

Tunable White

RGB / RGBW

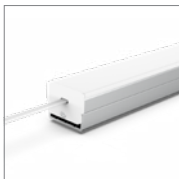

Extended portfolio of flexible LED light sources with various and carefully selected LED packages implemented on a thin flexible substrate offering an optimal cooling of the LEDs (Tj Away® technology). Their assembly is performed using a state-of-the-art fully automated production technology (Reel-to-reel) guarantying reliability and traceability of each batch.

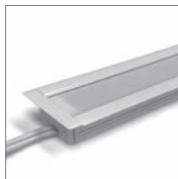

ASSEMBLED SOLUTIONS

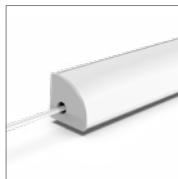

Surface

Recessed

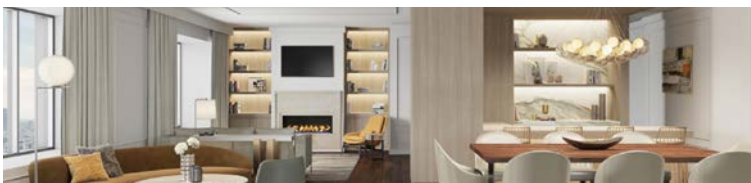

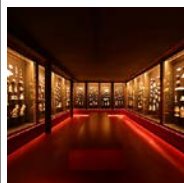

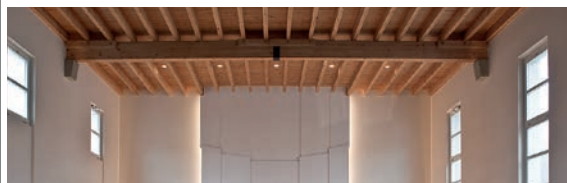

Corner

Bendable

Coupled with the world-class LED Linear tapes, Assembled Solutions provide the most efficient, diverse and accessible lighting solutions portfolio available to lighting planners. Offered with 9 different linear systems under three main application types, Assembled Solutions is the best choice to combine functionality, performance and availability.
